MEKTRONIC TESTER

M40413. WEIGHT 46 g. (with the battery).

FUNCTION

This tester checks the function of the different elements of the Mektronic system installed on a bike.

INSTALLATION

This tester is positioned in place of the Mektronic computer originally installed on the bike. After reading the user's guide delivered with this tester, it allows you to easily, quickly and efficiently detect a possible breackdown of any one of the different elements in the Mektronic system. Then, you just have to replace the identified element and initialize the system.
